Castration Ideas In Psychoanalysis

Castration anxiety is the fear of emasculation in both the literal and metaphorical sense. Castration anxiety is an overwhelming fear of damage to, or loss of, the penis—one of Sigmund Freud's earliest psychoanalytic theories. Although Freud regarded castration anxiety as a universal human experience, few empirical studies have been conducted on the topic.

Castration anxiety - Wikipedia

This article will discuss psychoanalytic feminism, not feminist psychoanalysis (i.e., except indirectly, it will not address ideas about developing feminist principles in clinical practice, although most of the authors discussed below are trained analysts).

Psychoanalytic Feminism (Stanford Encyclopedia of Philosophy)

According to Freud, the boy then experiences what he called castration anxiety which is a fear of both literal and figurative emasculation. Freud believed that as the child becomes aware of the physical differences between males and females, he assumes that the female's penis has been removed and that his father will also castrate him as a punishment for desiring his mother.

The Oedipal Complex: One of Freud's Most Controversial Ideas

Freud recognised the importance of anxiety. He was one of the first writers to argue that anxiety was a critical component of neurosis. Freud distinguished between 'objective' and 'neurotic' anxiety.
