Finland has no history of placing well in international comparisons of achievement in mathematics. However, the results of the PISA 2000 and 2003 studies are quite impressive, and they are further corroborated by similar results in the parallel scales in "ordinary" literacy, in science, and in problem solving (2003 only).

In Why Finland won't be teaching 'math' and 'history' anymore, the Christian Science Monitor writes that this is not a new concept: The idea of combining subjects to better facilitate learning is nearly a century old. American philosopher and educational reformer John Dewey thought that schooling should better reflect real life.

The History of Finland begins around 9,000 BC during the end of the last glacial period. Stone Age cultures were Kunda, Comb Ceramic, Corded Ware, Kiukainen, and Pöljä cultures. The Finnish Bronze Age started in approximately 1,500 BC and the Iron Age started in 500 BC and lasted until 1,300 AD. Finnish Iron Age cultures can be separated into Finnish proper, Tavastian, and Karelian cultures.

## **History of Finland - Wikipedia**

The first mathematics textbooks to be written in English and French were published by Robert Recorde, beginning with *The Grounde of Artes* in 1543. However, there are many different writings on mathematics and mathematics methodology that date back to 1800 BCE.

## **Mathematics education - Wikipedia**

Its particular draw is an accelerated math program, and many students plan to study science, engineering, or business at university. The modestly sized history department thus offers a taste of what Finnish history education is like at a school that is academically well-reputed but more oriented to STEM than humanities.
