The ideal solution differs in a fundamental way from the definition of an ideal gas, defined as a hypothetical substance that follows the ideal gas law. The kinetic molecular theory that explains ideal gas behavior assumes that the molecules occupy no space and that intermolecular attractions are totally absent.

Real Option Definition - investopedia.com
Real numbers are simply the combination of rational and irrational numbers, in the number system. In general, all the arithmetic operations can be performed on these numbers and they can be represented in the number line, also. At the same time, the imaginary numbers are the un-real numbers, which cannot be expressed in the number line and is commonly used to represent a complex number.

Definition Of Discriminant. The Discriminant of an equation gives an idea of the number of roots and the nature of roots of the equation. If $ax^2 + bx + c = 0$ is a quadratic equation, then the Discriminant of the equation, i.e. $D = b^2 - 4ac$. More About Discriminant. If discriminant (D) is equal to 0 then the equation has one real solution.
