Rational Emotive Behavior Therapy | Psychology Today

Rational emotive behavior therapy, previously called rational therapy and rational emotive therapy, is an active-directive, philosophically and empirically based psychotherapy, the aim of which is to resolve emotional and behavioral problems and disturbances and to help people to lead happier and more fulfilling lives. REBT posits that people have erroneous beliefs about situations they are involved in, and that these beliefs cause disturbance, but can be disputed with and changed.

Rational emotive behavior therapy - Wikipedia

On the other hand, rational emotive behavioral therapy, majorly known as REBT, is also another psychotherapy used to solve problems concerning stress. This therapy uses the replacement of self-rejecting feelings in a depressed person with self-believe and confidence (Ellis, 2013). The therapy challenges the rationale of bad thoughts about self.
