TIBCO Software is the leading independent provider of infrastructure software creating event-enabled enterprises to use on-premise or as part of cloud computing environments.

TIBCO Software - Global Leader in Integration and ...

Event-driven architecture (EDA) is a software design pattern that enables an organization to detect “events” or important business moments (such as a transaction, site visit, shopping cart abandonment, etc) and act on them in real time or near real time. This pattern replaces the traditional “request/response” architecture where services would have to wait for a reply before they could ...
